Contents

About the Authors	xvii
About the Technical Reviewer	xix
Acknowledgments	xxi
Introduction	xxiii

PART 1 ■ ■ ■ The Requirements: Begin with the End in Mind

■ CHAPTER 1	Defining the Requirements	3
	The First Meeting: Defining the Requirements	3
	Building the Plan of Attack	7
	Building a Report Draft and Report Style Guide	9
	Summary	10

PART 2 ■ ■ ■ Building the Database with SQL Server 2005

■ CHAPTER 2	Generating Result Sets with T-SQL 2005 Stored Procedures and UDFs	13
	Defining the Result Set	13
	Querying on a Variable Number of Selections	16
	Handling Variable Selections with XML	19
	Table-Valued UDFs and How to APPLY Them	20
	Moving On: UDF to Get Worker Rates	22
	Putting It All together: Stored Procedure GetTimeSheetData	24
	Summary	28

CHAPTER 3	More T-SQL 2005 Stored Procedures	29
	Building the Construction Job Summary Report	30
	Determining the Total Labor Data	31
	Retrieving Material Purchases	33
	Retrieving Invoiced Amounts and Payments	34
	Putting It All Together	35
	Building the Result Sets for an Aging Receivables Report	36
	General SQL Server Programming Tasks	40
	TOP N Reporting	40
	Common Table Expressions/Recursive Queries	41
	Implementing Audit Trail Functionality	43
	Getting Immediate Feedback with OUTPUT and OUTPUT INTO	
	in SQL Server 2005	45
	Using Dynamic SQL (and Finding Alternatives)	45
	New Functions in SQL Server 2005 to Assign Ranking Values	47
	Implementing Better Error Handling with TRY...CATCH	48
	Using LIKE to Perform Text Searches	49
	Working with XML Data	49
	Using Date Parts	51
	A Cleaner Alternative to IN: INTERSECT and EXCEPT	52
	APPLY Revisited: Using UDFs with Correlated Subqueries	52
	Using SQL Server 2000	53
	Summary	54
	Recommended Reading	54

PART 3 ■ ■ ■ Defining and Building the Architecture

CHAPTER 4	Building Remoting/Web Service Solutions with Interfaces	57
	Begin with the End in Mind	58
	.NET Remoting	58
	.NET Web Services	61
	Your Development Goals	62
	Remoting and Web Services	67
	General Usage Notes for .NET Remoting	68
	General Usage Notes for .NET Web Services	68

Defining the Interface	68
Building a Remoting Application	69
Writing the Server-Side Code	70
Building the Client-Side of a Remoting Piece	73
Building a Web Service	74
Building a Web Service	74
Using the Web Service from a Client Application	79
Creating a Factory to Simplify the Process	84
New Features for Remoting in Visual Studio 2005	88
Secure TCP Remoting and TCP Channel Timeouts	88
The New IPC Client Channel	89
Serializing DataSets in a Binary Format	89
Using .NET Generics to Simplify Remoting Interfaces	90
Summary	91
Recommended Reading	92

■ CHAPTER 5 **Building a Data Access Layer** 93

Overview: What Is a Data Access Layer?	93
Requirements for a DAL	94
Building a Data Access Class	95
Handling Multiple Databases with a DBKey Identifier	95
Handling Stored Procedure Parameters	98
Implementing a Custom Timeout	100
Using Your Basic Data Access Class	102
Are You Satisfied with This?	102
Populating Typed DataSets Using .NET Generics	103
Looking at Where You Are	105
The Aging Report Business Object (bzAgingReport)	106
The Aging Report Web Service (wAgingReport.asmx)	106
The Aging Report Data Access Class (daAgingReport.cs)	107
Your Final Data Access Class (cgsDataAccess.cs)	108
Extending a Data Access Class	111
Multiple Active Result Sets	111
Loading a DataSet from a DataReader	112
Using Provider Factories to Support Multiple Database Products	112
Asynchronous Processing Made Simple	113
Summary	116

CHAPTER 6	Using Strongly-Typed DataSets	119
	What Are Typed DataSets?	119
	Building Typed DataSets for This Application	120
	Building a Utility to Generate a Typed DataSet from Your Stored Procedures	120
	Creating a Typed DataSet Manually	124
	Benefits of Typed DataSets	126
	Strong Typing	126
	Easier Traversing of Hierarchical Data	127
	Find Your Way Easier	127
	Null Value Handling	128
	But Wait—More Benefits!	128
	Reporting	128
	Subclassing	128
	Simplify Data Binding	129
	Using Typed DataSets with Designer Tools	129
	Using Typed DataSets for Reports	129
	Viewing Typed DataSets in Windows Forms	130
	Overcoming the Shortcomings	133
	The Great Debate on Typed DataSets	134
	Stop the Presses! Something Doesn't Match	134
	Breakpoint: The Architecture As It Stands	136
	Breaking Down the Code	138
	Summary	141
	Recommended Reading	141
CHAPTER 7	Middleware Data Summarization Using Typed DataSets	143
	Capabilities in ADO.NET	143
	The Scenario: Produce an Aging Report Result Set from a Flat List of Invoices	144
	Step 1: Creating an Instance and Adding Rows	146
	Step 2: Creating Default Column Values for New Rows	147
	Step 3: Looping Through Strongly-Typed Rows	148
	Step 4: Performing Date Math	148
	Step 5: Performing Lookups on Primary Keys	149
	Step 6: Filtering	150
	Step 7: Performing the Equivalent of SELECT DISTINCT	152
	Step 8: Handling Data Relations	152

Step 9: Computing Subtotals Automatically	154
Step 10: Computing Subtotals Manually	155
Putting It All Together	157
Some Miscellaneous ADO.NET Tips	161
Reading/Writing NULL Values	161
More Date Handling	162
Choices, Choices: When to Use RowFilter, When to Use Select()?	163
Summary	163

PART 4 ■■■ Report Writers

■ CHAPTER 8	Basic/Intermediate Report Design with Crystal Reports	167
	Versions of Crystal Reports	168
	The Crystal Reports Push Model	168
	Building a Reusable Header and Footer Subreport	169
	Creating the Generic Report Header and Defining the Data Source	170
	Editing Options	175
	Using Report Sections to Build the Report Header	178
	Building the Footer Page	180
	Using the Report Header and Footer in a New Report	182
	“Houston, We Have a Problem”	185
	Implementing a Base Report Template	186
	The End Result	186
	Integrating the Header Subreport and a New Base Report Template	186
	Using Your New Base Report Template	196
	Summary	197
■ CHAPTER 9	Advanced Report Design with Crystal Reports	199
	Report 1: Implementing the Timesheet Report	200
	The End Result	200
	The Result Set	201
	The Steps to Build It	202
	Final Notes	219

Report 2: Implementing the Gantt Chart	219
The End Result	219
The Result Set	220
The Steps to Build It	221
Report 3: Implementing Dynamic Images on a Customer Invoice	227
The End Result	227
The Result Set	228
The Steps to Build It	228
Report 4: Implementing a Stacked Bar Chart	229
The End Result	229
The Result Set	230
The Steps to Build It	230
Report 5: Implementing the Labor/Cost Report/Graph	234
The End Result	235
The Result Set	237
The Steps to Build It	238
Final Note: The Aging Receivables Report	242
Summary	242

■ CHAPTER 10 Using ActiveReports for .NET

ActiveReports Basics	243
Creating Your First Reporting Application	243
Binding to the XML-XSD File	245
Simple ActiveReports Layout	247
Creating a Report Viewer	249
Building Header and Footer Subreports	251
Header/Footer Strategy	252
Creating the Header	252
The Timesheet Details Report	260
Creating Subtotals and Totals	263
Printing	265
Exporting	266
Summary	268

■ CHAPTER 11 Using Microsoft SQL Server Reporting Services

What Is SQL Server Reporting Services?	269
SSRS Basics	269
Creating a Report Project	269
Configuring Your Project	270
Reporting Project Components	271

Accessing XML Data with SSRS	272
Accessing Data from a Static XML Data Source	272
Creating Your First Report	274
Examining the Report Designer	274
Creating an SSRS Dataset	277
Basic XML Query Syntax	278
Presenting Your Data	281
Deploying Your Project	284
Accessing Data from Web Services	285
Creating the Test Web Service	285
Creating the Data Source	289
Basic Web Service Syntax	290
Understanding SOAP Request and Response Packets	291
Parameter Query Syntax	293
Summary	297
Recommended Reading	297

■ CHAPTER 12 Integrating the Reporting Tool with the Application 299

Begin with the End in Mind: Your Final Result	299
Using the Crystal Reports .NET Object Model	300
The ReportDocument Object Model	301
Building a Generic Crystal Reports .NET Library	314
The Generic Report Manager: ccCrystalManager	315
Report Header/Footer Data Objects: ccReportInfo	321
The Generic Print Options Form: ccCrystalPrintOptionForm	322
The Generic Report Preview Form: ccCrystalViewer	323
Miscellaneous Reporting Tasks	324
Determining the Current Executing Folder for Exporting to a Location	324
Loading Untyped Reports	325
Changing Report Authentication	325
Utilizing Your Library to Generate a Report	326
Building the Aging Receivables Report	326
The Final Results for the Aging Receivables Report	327
Summary	339
Recommended Reading	340

PART 5 ■ ■ ■ Building the Client Piece

■ CHAPTER 13	Constructing the User Interface	343
	Building Reusable Winforms Classes	343
	Creating Winform Classes	346
	Subclassing the Windows Forms Controls	349
	Creating an Inherited Windows Form	355
	Some Commentary on the Visual Studio Forms Designer	361
	Building an Authentication Screen	362
	Building the Layers, Redux	364
	Creating a Report Options Screen	382
	Creating a Reusable Record Selection Screen	383
	Creating a Reusable Footnote Entry Screen	391
	Building Your Report Options Screen	391
	Viewing Previously Saved PDF Files	398
	Summary	400
■ CHAPTER 14	Building Report Output Using Microsoft PowerPoint	401
	Introducing PowerPointTools	401
	Creating PowerPointTools: Begin with the End in Mind, Times Two!	402
	An Overview of PowerPointTools	402
	Adding COM References to the PowerPoint and Excel Object Models	403
	The Source Code for PowerPointTools	405
	Using PowerPointTools	418
	Creating an Instance of PowerPointTools	418
	Starting a New Presentation with a Template and a Title Page	419
	Creating a Text-Only Slide with a Title and a Set of Bullet Points	422
	Building an Excel Table to Be Used As the Source of a PowerPoint Table	424
	Creating a Slide That Displays an Excel Table	426
	Building an Excel Table to Be Used As a Source of an Excel Chart Object	428
	Setting Animations and Slide Transitions	438
	Defining Slide Footer Information	439
	Saving the Presentation	440
	Closing Excel	440
	When in Doubt, Use Office Macros!	440
	Summary	442

PART 6 ■ ■ ■ Appendixes

APPENDIX A	Client Specs	445
	1. Timesheet Report	445
	2. Construction Job Summary/Profit Report	446
	3. Project Timeline (Gantt) Chart	448
	4. Client Invoice	448
	5. Aging Receivables Report	449
	6. Combination Report/Graph of Labor and Costs	450
	7. Stacked Bar Chart Showing Labor/Costs by Month	452
	8. Construction Job Profile Report	453
APPENDIX B	Database Schema	455
	Database Schema	455
	Categories of Data	461
	Employees and Rates and Rate Types	461
	Overhead Rates	461
	Construction Job Master Data	462
	Timesheet/Labor Data	463
	Material Purchases	463
	Jobs and Invoices and Invoice Receipts	464
APPENDIX C	Technical Roadmap and Reference	465
	Application Component Reference	465
	The Common Ground Framework Library	465
	The Construction Demo Solution	471
	Class Library Project: ConstructionDemo.Business	472
	Class Library Project: ConstructionDemo.DataAccess	473
	Windows Application Project:	
	ConstructionDemo.RemotingServer	475
	Class Library Project: ConstructionDemo.CrystalReports	475
	Class Library Project: ConstructionDemo.Datasets	476
	Class Library Project: ConstructionDemo.Interfaces	476
	Class Library Project: ConstructionDemo.WebServices	477
	Main Windows Application: ConstructionDemo.Client.WinForms	478

Some Final Notes 478

Setting Project Dependencies 478

Alternative Approaches 479

Handling Master Tables 480

Looking at the User Interface 480
